

Backup card

3-pack

The analog backup for your digital coins.

Creating a backup of your Bitcoin and crypto wallet ensures that your funds can be restored even if you lose or break your hardware wallet.

The BitBox02 allows you to create an analog copy of your backup by writing down 24 recovery words, in addition to the automatic backup on microSD card.

Our Backup card is made for securing your wallet backups long-term. It is made of ageing-resistant cardstock and features self-lamination for additional protection.

Simple

Clear instructions, low-tech, no tools needed

Ageing-resistant

Archival cardstock, free of acid and chlorine

Durable

Solid card with lamination protection
